

1. Is there record of municipal water or sewer?
 - a. Property was connected to sewer. Sewer connection has been abandoned.
2. Is there a well or septic?
 - a. Property has a well, the well is in process of being sealed.
3. Is there a basement under the whole house?
 - a. City does not have building plans that identify the level of basement. All interior photos available are located within Hazard Assessment
4. On the other sections without the assumed basement, is there a wood or concrete floor?
 - a. City does not have building plans that identify the type of structuring to determine if there is concrete under all areas of the floor or if there is wood and dirt placement.
5. Why is entry to the property not available?
 - a. Property has extensive mold and soft floors due to water intrusion. Safe entry is not available. Please see property photos and information in assessment report for interior considerations
